Random question

Question 5   **0.6 / 1 point**

Match the memory technology with the application

  2   Non-volatile program memories for micro controllers

                                                       1. FRAM

  1   Data logging with limited power

                                                       2. SRAM

  4   Non-volatile program memories for DSPS and Processors

                                                       3. NOR

  4   Flash memories that require ECC

                                                       4. NAND

  3   Flash technology that is good for fast random access

Attempt Score:	9.6 / 10 - 96 %
Overall Grade (highest attempt)**:**	9.6 / 10 - 96 %
